The Structure Is:

A harmonic set of longitudinal wavepairs. In each wavepair the two waves superpose spatially, but travel in opposite directions. The two are phase conjugates and time-reversed replicas of each other. Thus they comprise a coupled longitudinal wave and antiwave. Each wavepair is a time-density wave and therefore an electrogravitational wave.

In a dense signal environment, phase conjugation effects become significant, generating PCR signals which couple to and backtrack the cells' and tissues' own signals, thus penetrating deeply throughout the body with weak partial cancellation jamming.
