Adobe Portable Document Format Version of Federal Bureau of Investigation file on Philip J. Klass

February 2, 2006

This file contains the releasable portions of the FBI files on Philip Julian Klass provided to CUFON by Washington, DC area researcher Michael Ravnitzky. Some pages were not released and some material in the released pages has also been redacted. The decision to withhold material on the grounds of the b1 exemption (classified national security information) has been appealed.

Philip Julian Klass born on November 8, 1919 at Des Moines, Iowa and died August 9, 2005 Merritt Island, Florida at the age of 86. Klass had a Bachelor degree in electrical engineering from Iowa State University (1941) and worked as an aviation electronics engineer for General Electric. He joined Aviation Week, (later Aviation Week & Space Technology [AW&ST]) in 1952 and served as a senior editor of AW&ST for thirty-four years. Klass was a fellow of the Institute of Electrical and Electronics Engineers and was also a member of the American Association for the Advancement of Science, the Aviation/Space Writers Association, the National Press Club, the National Aviation Club, and a fellow (founding member) of The Committee for the Scientific Investigation of Claims of the Paranormal (CSICOP). Among the several books he wrote are *UFOs -- Identified* (1968), *The Real Roswell Crashed-saucer Coverup* (1997), and *UFO Abductions: A Dangerous Game* (1989), and *Bringing UFOs Down to Earth* (1997).

The FBI file makes reference to (and contains part of) some material mailed in 1976 to “The Bell Labs, Murray Hill, New Jersey,” bearing the return address “Philip J. Klass, Box 6030, Dallas, Texas 75222.” As noted by the FBI, the many pages of fine printed material are a rambling mish-mash. One of several speculative possibilities is this material was created and sent in Phil’s name in an attempt to discredit him. No conclusion or statement from Mr. Klass regarding this material is contained in the FBI file. The fine printed material from the file has been scanned at a higher resolution than the rest of the file for increased readability and is provided in a separate PDF file: http://www.cufon.org/cufon/Klass_FBI-smprt.pdf.

“Uncle Phil” as he was known among his fans and detractors never failed to engender controversy and polarize strong feelings which ranged from high praise to downright hate. Mr. Klass was the leading skeptic of the extraterrestrial origins of UFOs, but one who frequently engaged in distasteful *ad hominem* (personal) attacks.

Below are a few links to web sites about Phil Klass. These are but a few of many. Just put “Phil Klass.” or “Philip Klass” in any web search engine and you will be rewarded with many hits.

61 page(s) were reviewed and 56 page(s) are being released.

- Document(s) were located which originated with, or contained information concerning other Government agency(ies) [OGA]. This information has been:
 - referred to the OGA for review and direct response to you.
 - referred to the OGA for consultation. The FBI will correspond with you regarding this information when the consultation is finished.

You have the right to appeal any denials in this release. Appeals should be directed in writing to the Co-Director, Office of Information and Privacy, U.S. Department of Justice, Flag Building, Suite 570, Washington, D.C. 20530-0001 within sixty days from the date of this letter. The envelope and the letter should be clearly marked "Freedom of Information Appeal" or

"Information Appeal." Please cite the FOIPA number assigned to your request so that it may be easily identified.

The enclosed material is from the main investigative file(s) in which the subject(s) of your request was the focus of the investigation. Our search located additional references, in files relating to other individuals, or matters, which may or may not be about your subject(s). Our experience has shown, when ident, references usually contain information similar to the information processed in the main file(s). Because of our significant backlog, we have given priority to processing only the main investigative file(s). If you want the references, you must submit a separate request for them in writing, and they will be reviewed at a later date, as time and resources permit.

See additional information which follows.

Sincerely yours,

A handwritten signature in black ink, appearing to read "D Hardy", with a stylized flourish at the end.

:

EXPLANATION OF EXEMPTIONS

SUBSECTIONS OF TITLE 5, UNITED STATES CODE, SECTION 552

- (b) (1) (A) specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and (B) are in fact properly classified pursuant to such Executive order;
- (b) (2) related solely to the internal personnel rules and practices of an agency;
- (b) (3) specifically exempted from disclosure by statute (other than section 552b of this title), provided that such statute (A) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;
- (b) (4) trade secrets and commercial or financial information obtained from a person and privileged or confidential;
- (b) (5) inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency;
- (b) (6) personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;
- (b) (7) records or information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information (A) could reasonably be expected to interfere with enforcement proceedings, (B) would deprive a person of a right to a fair trial or an impartial adjudication, (C) could reasonably be expected to constitute an unwarranted invasion of personal privacy, (D) could reasonably be expected to disclose the identity of a confidential source, including a State, local, or foreign agency or authority or any private institution which furnished information on a confidential basis, and, in the case of record or information compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source, (E) would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law, or (F) could reasonably be expected to endanger the life or physical safety of any individual;
- (b) (8) contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or
- (b) (9) geological and geophysical information and data, including maps, concerning wells.

SUBSECTIONS OF TITLE 5, UNITED STATES CODE, SECTION 552a

- (d) (5) information compiled in reasonable anticipation of a civil action proceeding;
- (j) (2) material reporting investigative efforts pertaining to the enforcement of criminal law including efforts to prevent, control, or reduce crime or apprehend criminals;
- (k) (1) information which is currently and properly classified pursuant to an Executive order in the interest of the national defense or foreign policy, for example, information involving intelligence sources or methods;
- (k) (2) investigatory material compiled for law enforcement purposes, other than criminal, which did not result in loss of a right, benefit or privilege under Federal programs, or which would identify a source who furnished information pursuant to a promise that his/her identity would be held in confidence;
- (k) (3) material maintained in connection with providing protective services to the President of the United States or any other individual pursuant to the authority of Title 18, United States Code, Section 3056;
- (k) (4) required by statute to be maintained and used solely as statistical records;
- (k) (5) investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment or for access to classified information, the disclosure of which would reveal the identity of the person who furnished information pursuant to a promise that his/her identity would be held in confidence;
- (k) (6) testing or examination material used to determine individual qualifications for appointment or promotion in Federal Government service the release of which would compromise the testing or examination process;
- (k) (7) material used to determine potential for promotion in the armed services, the disclosure of which would reveal the identity of the person who furnished the material pursuant to a promise that his/her identity would be held in confidence.

In January, 1958, a matter was referred to this Bureau for investigation by the District Commander, 4th District Office of Special Investigations, Department of the Air Force, Bolling Air Force Base, Washington, D. C. This matter involved the unauthorized disclosure of information classified "Secret" in "Aviation Week Magazine" article entitled "Exclusive Report on Counter Measures" by Philip J. Klass in 18 November, 1957, and 25 November, 1957, editions. No investigation was conducted in this matter by this Bureau inasmuch as this Bureau was advised by Department of the Air Force that such classified information as was contained in the article could not be declassified for purposes of prosecution.

TO : Mr. Moore

DATE: 2/21/75

FROM : Mr. Heim

SUBJECT: PHILIP J. KLASS
 SENIOR AVIONICS EDITOR
 AVIATION WEEK & SPACE TECHNOLOGY
 CRITICISM OF FBI

BACKGROUND:

Late in the afternoon of 2/18/75, captioned individual telephoned the Bureau and spoke with the Editor of the FBI Law Enforcement Bulletin (LEB). In strong terms laced with sarcasm, he derided our publication of the article by Dr. J. Allen Hynek, "The UFO Mystery," in the February, 1975, issue of the LEB. Klass suggested that by publishing this article, the FBI had given its endorsement to a hoax (that UFOs are extra-terrestrial in origin) and to a fraud (Dr. J. Allen Hynek). Klass went on to state that he had investigated UFO sightings "with the thoroughness of the FBI" over a period of many years and found not one shred of evidence that any such objects as UFOs existed, let alone that they were from beyond the earth's atmosphere. He also contended that his investigations have led to several books and many articles on the topic.

Mr. Klass was politely reminded that nowhere in Dr. Hynek's article appearing in the Bulletin, or in numerous other of his writings which were examined by us, does Hynek suggest that UFOs are extra-terrestrial in origin. Additionally, it was pointed out to Klass that the term "UFO (Unidentified Flying Object)" leaves room for all manner of phenomena both real and imagined.

Furthermore, Klass was informed that the only thing the FBI endorsed in the publication of Dr. Hynek's article was its clearly stated premise that "[r]egardless of the source of UFOs or their legitimacy, these sightings represented a challenge for law enforcement...." to whom persons would normally first report their observations.

As to the suggestion that the author is a fraud, Klass was informed that Hynek is a widely respected scientist, recognized by all creditable professionals in his field of expertise, who is affiliated with a leading university (Northwestern University). This, Klass replied: "He won't be for long!"

Mr. Hein to Mr. Moore Memorandum
RE: Philip J. Klass

Klass would not elaborate on this statement, nor was he requested to do so.

Moreover, Klass contended that Hynek's bias toward the notion that UFOs are actually objects and creatures from outer space was demonstrated following his interview of the two men from Mississippi who reported they were held captive for a time by green, other worldly beings who arrived on earth and departed from it in a saucer-shaped spaceship. Klass stated that Hynek reportedly said, "There is no doubt these men have had a terrifying experience." Mr. Klass was told that many people would draw no such inference as he had from this remark.

The conversation was concluded when Klass suggested that we might be interested in publishing an article by a newly formed organization called the "Center for Unidentified Ghosts."

INFORMATION CONCERNING KLAS:

(S) b1

Bufiles disclose that Klass has, from time to time, come to our attention by virtue of the fact that he has been in

[REDACTED]

[REDACTED]

(S) b1 this Bureau [REDACTED] and not to be of assistance to his government."

Klass has been affiliated with Aviation Week & Space Technology magazine for at least the past 20 years. This periodical is published by McGraw-Hill, Inc., with offices in New York. However, Klass is based in Washington, D.C., and maintains an office in the Press Building on 14th Street, Northwest, and is listed in the D.C. telephone directory at 560 N Street, Southwest.

A book review concerning one of his published works entitled "UFOs -- Identified," published by Random House, credits him with a scientific approach to explaining the UFO phenomena, but specifically notes that he is in disagreement with Dr. Hynek and others prominent in this field.

Klass' attempts to discredit Hynek are totally without foundation. Hynek could scarcely have any better scientific cre-

REC-16

62-116443-2

June 23, 1975

Mr. Philip J. Klass
560 N Street, Southwest
Washington, D.C. 20024

Dear Mr. Klass:

Thank you for your letter of June 14, with enclosures, regarding the article, "The UFO Mystery," by Dr. J. Allen Hynek, which appeared in the February, 1975, issue of the FBI Law Enforcement Bulletin. The concern which prompted you to write is appreciated.

Quite contrary to the news clipping you enclosed, Dr. Hynek's article has been accurately and rationally reported by the media throughout the country. None of the responsible media, to my knowledge, have ignored the clearly stated theme of the article: "[r]egardless of the source of UFOs or their legitimacy, these sightings represented a real problem for law enforcement...." to whom persons normally first report their observations. This is the only premise the FBI has endorsed in publishing the article.

I could not agree more with your implication that law enforcement personnel should look after their primary responsibility--crime, not UFOs. This is precisely the reason we believe the Center for UFO Studies can help to free law enforcement personnel from investigating and reporting on phenomena unassociated with crime.

While we are most grateful for your offer to prepare a manuscript for publishing consideration in the Bulletin, a careful review of the magazine's commitments, regrettably, leaves us no opportunity to accept your proposal in the foreseeable future.

Sincerely yours,

Clarence M. Kelley
Director

FBI/DOJ

Mr. Philip J. Klass

NOTE: Klass is well known to us. Shortly after publication of Dr. Hynek's article, he telephoned the Bulletin's editor (See Heim to Moore memorandum dated 2/21/75, re "Philip J. Klass, Senior Avionics Editor, Aviation Week & Space Technology, Criticism of FBI") and in scornful terms similar to his letter derided our publication of Hynek's article. He suggested that the FBI had been drawn into a hoax perpetrated by a fraud (Dr. Hynek). Klass is deficient on all points of his argument, particularly concerning the credentials of Dr. Hynek which could scarcely be better. Hynek has been associated professorially with some of the finest universities in this country and is recognized in the most prestigious scientific circles. On the otherhand, Klass has no such sterling reputation and has twice been under FBI investigation in connection with the unauthorized publication of classified information. Both of these cases are closed. "The National Tattler," a clipping from which Klass enclosed, is a tabloid which, until recently, specialized in bawdy sex stories but now deals in sensationalism manufactured by grossly distorting stories associated with prominent persons and agencies.

Mr. Clarence Kelly, Director
Federal Bureau of Investigation
Washington D.C.

Dear Mr. Kelly:

The enclosed photo-copy of a headline and feature story in a recent issue of the tabloid "The National Tattler" is a portent of the sort of "FBI endorsement" for the flying-saucer myth that you can expect to see, repeatedly, as a result of the article on UFOs carried by the February issue of The Law Enforcement Bulletin.

That article was written by Dr. J. Allen Hynek, the spiritual leader of the vocal group of "believers" and "kooks" who claim that we are being visited by extraterrestrial spaceships. While the FBI did not endorse Hynek's views per se, the decision to publish his article and to alert law enforcement agencies as to what to do "if they land," has enbroiled the agency for all time.

For a quarter-century, the U.S. Air Force had this monkey on its back and wisely, in 1969, bowed out of the UFO business. Now, according to the enclosed article, the FBI's decision to publish the Hynek article represents the first time that "an agency of the federal government admits that UFOs are worthy of concern."

The Hynek article published by the FBI encourages law enforcement officers to take the time--from much more pressing duties--to take calls from people who report seeing UFOs and to in turn relay such calls to Hynek's own UFO group.

REC-16

62-116473-117

Surely in these times law enforcement officers have more useful things to occupy their time and attention.

For the past 10 years, my hobby has been investigating, and explaining, famous UFO cases that Hynek and others proclaim to be unexplainable. Recently, I have published a book entitled "UFOs Explained," which has received very favorable reviews from such prestigious publications as "Scientific American." (See enclosure.)

I would welcome the opportunity to present the other side of the UFO issue in The Law Enforcement Bulletin, and to thereby help remove the earlier seeming FBI endorsement of flying saucers.

Cordially,

FBI Admits UFOs Exist

Story in Agency's Official Magazine Instructs Lawmen
On Procedure to Follow When Flying Saucer Is Spotted

For the first time since the Air Force closed the books on its investigation of unidentified flying objects in the 1960s, an agency of the federal government admits that UFOs are worthy of concern.

The FBI went on record as taking UFOs seriously by publishing in its official magazine an article that tells law enforcement officers what to do when a flying saucer is sighted.

Dr. J. Allen Hynek, perhaps the most respected authority on UFOs in the country, wrote the 5,000 word article titled "The UFO Mystery - Investigating Reports of Sightings."

It appears in a recent issue of "FBI Law Enforcement Bulletin," circulated among some 80,000 police officers across the country and read by millions.

With the publication of this article, the nation's top law enforcement agency seems to say it considers UFOs worthy of serious investigation.

THE AUTHOR, Dr. J. Allen Hynek, is chairman of Northwestern University's Department of Astronomy and director of the Center for UFO Studies in Northfield, Ill., a clearing house for research on the decades-old UFO puzzle.

His impressive list of credentials include being a former consultant to the Air Force on aerial phenomena. And he has written widely on the topic for many years.

His article in the FBI publication begins by noting, "It is natural for law enforcement agencies to solve mysteries."

The article goes on to tell policemen that they can "now help solve what may be one of the greatest mysteries of all time."

On many occasions police officers have had their own encounters with UFOs, the article notes.

The following episodes occurring in 1973 were cited as typical examples:

• On Oct. 16, 1973, the crew of a Delaware State Police helicopter, along with flight controllers at the Dover Air Force Base, reported a UFO which the helicopter crew chased 14 miles across Kent County.

• Several days later, two Adams County, Ohio, deputies on a routine patrol at 7 a.m. reported a UFO hovering some 200 feet above the ground.

• On Oct. 19, 1973, a Tulsa, Okla., police sergeant confirmed another officer's report of a hovering multi-colored object whose size, they said, would dwarf a 747 jetliner.

By CLIFF LINEDECKER
Of the Tattler Staff

• Two Los Angeles policemen, on Nov. 12, 1973, said they saw a large, round, bluish-white object at 9:50 p.m., and observed its maneuvers for more than a minute before it disappeared "at a dazzling rate of speed."
• On Dec. 29, 1973, area policeman in Culpeper, Va., sighted three UFOs.

DR. HYNEK SUGGESTS that the subject of UFOs be treated more seriously and not as a matter of ridicule.

"For years," he writes, "we have laughed at UFOs and the people who report them. But now, after a quarter of a century of poking fun, of laughing it off, and of calling UFOs entirely the result of overheated

imaginings, the scientific world is slowly awakening to the fact that something real is going on. Science and law enforcement agencies are facing a mutual problem, as they have many times before."

The responsible scientist writes that he is convinced that many UFO sightings go unreported because citizens do not want to be laughed at.

Dr. Hynek says that police officers question persons reporting a UFO sighting should be prepared to handle an excited, "sometimes hysterical" person.

THE SCIENTIST THEN outlines the type of information police officers should seek from persons reporting a UFO sighting.

Officers should forward the information to the Center For UFO Studies, Dr. Hynek advises.

The center can properly evaluate the information, he notes.

Unless a flying saucer, Dr. Hynek writes, has actually landed, the police officer accomplished his mission when he sends information to the center.

"In the event that the caller states an object has landed, and especially if damage to property or danger to life is indicated, police action is obviously called for," Dr. Hynek writes. "In such cases, it is important for scientific and public safety purposes that the affected area be cordoned off and protected from the public until qualified investigators arrive."

Dr. Hynek broke the type of UFO sighting into three categories:

• A sighting at close hand but nothing happens.

• At sighting in which something tangible

CHIEF Clarence Kelly ... his agency's official publication has all but admitted the existence of UFOs.

does happen, such as marks being left on the ground.

• Space creatures themselves are sighted.

Hynek also described that he termed a misconception about the UFO phenomenon which are "held generally by those who have never examined the data."

FIRST MISCONCEPTION, Dr. Hynek is the mistaken belief that "UFO reports are made mainly by crackpots."

"Facts are otherwise, Dr. Hynek noted. "Police officers, commercial and military pilots, air traffic controllers, scientists and schoolteachers," often have been among the witnesses, he pointed out.

Another widely held misconception is that reporters of UFOs have greatly overestimated imaginations.

SCIENTIFIC REPORTS themselves argue strongly against this," Dr. Hynek writes.

The reports do not range over a broad spectrum. There are virtually no reports of unidentified sailing objects, or of UFOs with wheels or wings, and there are no reports of flying pink elephants or of the Empire State Building being seen upside down in Pittsburgh.

Overheated imaginations should certainly generate a far wider range of reports than that of the typical UFO reports we do receive."

Dr. Hynek said UFO reports should be taken seriously, and he added that police officers have the opportunity to help solve the flying saucer mystery.

by Philip Morrison

THE GALACTIC CLUB: INTELLIGENCE IN LIFE IN OUTER SPACE, by Ronald L. Bracewell. W. H. Freeman and Company (\$3.95). **UFOs EXPLAINED**, by Philip J. Klass. Random House (\$8.95). The canon of space cartoons is full of wit, but no finer example can be found than the scene, imagined already in the year of Sputnik by Whitney Darrow, Jr., of the decisive moment in Eden mere seconds before the Fall. Eve is reaching for the apple, while the serpent lurks. But is it our Eden? Surely not, for the nude, still innocent pair, otherwise quite our own kind, sport little knobbed forehead antennae. Toward her rushes the astronaut, polite, tainted and knowing, his earthly rocket in the background: "Miss! Oh, Miss! For God's sake, stop!"

Ronald Bracewell is a distinguished radio astronomer and an artist with both brush and pen. Among the three dozen pictures in this delightful book, which is everywhere lighthearted but nowhere frivolous, is one of his own wash paintings, showing the swamp of another world. There are many other evocative outworldly prints and reproductions, including J. J. Grandville's juggler with planets, M. C. Escher's luminous surf where life lies implicit, Wassily Kandinsky and the California contemporary Jesse Allen. In this defining ambience he sets 15 graceful brief chapters (only one runs more than 10 text pages) that survey in an up-to-date, easily read way the issues of that most discussed conjecture of contemporary science: "Somewhere in this galaxy or another I think there is other intelligent life." He urges study, rather than action now, but he plainly looks ahead to a grasped opportunity for interstellar contact. On the way to this reserved conclusion he marshals the evidence without much technical demand on the reader, with a variety of graphs and tables. The usual arguments about planets, stars and life's origin are presented in a personal and engaging way.

BOOKS

Other conceptions of the search for extraterrestrial intelligence

To them he adds much fresh material. Here is an account of Project Cyclops, the 1971 summer study of the Stanford/NASA/Ames Faculty Fellowship program that produced a valuable report describing an ambitious microwave system—its eventual 10,000 dishes covering an entire desert county—for searching out messages in the galactic noise. Then he explains his own conjecture of a set of automatic probes, each sent to search star systems until it finds a plausible candidate for membership in the Galactic Club. There it orbits, eavesdropping, until finally it can relay back home news of its success.

Two of Bracewell's chapters are explicit critiques, one of Immanuel Velikovsky's interplanetary "vermin," the other of Erich von Däniken's astronaut-gods. To Velikovsky he turns a forbearing cheek: he accepts that the learned man's literary sources admit the possibility of some cometary worldwide catastrophe about 1500 B.C. but is entirely skeptical in detail of the bizarre proposal that a comet brought vermin from Jupiter or Venus to the earth in those days. For the best-selling von Däniken, whose entire output is at a charitable estimate disingenuous, he shows less tolerance. That author denied the old Egyptians rope or wooden rollers to haul their pyramid stones, since their desert oases could not spare such goods! Von Däniken does not even mention the extensive Egyptian trade in cedar timbers from Lebanon or the museum samples of their heavy rope. A Russian author is cited to debunk tellingly the cosmonaut spacesuits seen by von Däniken on Ainu statuettes. Why are these figures mainly women, with protruding bare breasts? (Why should they "pose before the ancient Ainu partially depressurized...?") Those books, Bracewell says, "are a romanticist's fiction."

Bracewell himself has produced no fiction here; his hypothesis may be romantic, but he brings to it what it deserves: skeptical, evidential and measured test. His book is a model for popular science at its margins, tempted by the speculative a little past the stroke of Oc-

cam's razor but confident in its eventual ability to approximate the truth. If we are not alone, we should someday be aware of it.

The book by Philip Klass is in an entirely different mood. Here is an informed investigative reporter at work, testing the alleged reports of witnesses and pulling hard link by link at the chains of evidence for the flying saucers. Do you cite the radar-visual reports of pilots and radar men around Lakenheath in England in the mid-1950's? Then be prepared to understand the moving-target indicator of the CPS-5 radar at Lakenheath. You may be chasing spurious blips, and "if an operator decides that a succession of such blips all derive from a single target, then he can easily conclude" that he is watching a UFO that can stop and start instantly and move at impossible speeds. A single false visual report by a fighter pilot who demonstrably did not fully understand his own radar would remove this strange case from mystery into the commonplace puzzle of radar "angels." It is clear that even confirmed radar reports can be no better than our knowledge of radar illusion, just as eyewitness accounts can be no better than our knowledge of optical illusion. No UFO author has taken such a look at radar as Klass, whose decade of experience in the field as an engineer has been augmented by a later career as a knowing technical reporter covering the aerospace industry. (Indeed, his own earlier book seeking a unified physical cause behind many UFOs—plasma discharges on power lines—itsself made a case too strongly based on a few erroneous reports and doctored photographs, some of which he mentions here.)

This is a good-sized, meaty, rather contentious work. It treats very successfully many of the classic "sightings" of the past, making a strong *prima facie* case of fraud in several of the best-known. The most recent flap (late in 1973) culminated in the tales of two shipyard workers from Pascagoula who reported that they had been taken aboard a flying saucer for examination by aliens. Within 48 hours they were

SCIENTIFIC
AMERICAN
May 1975

famous, with coverage on the television networks and worldwide wire services and with their own booking agent. The only evidence was their verbal account of an encounter aboard a saucer with lobster-clawed, floating astronauts. It is hard to see why they were believed by professors from Evanston and Berkeley, who endorsed the unsupported tale with "something here... not terrestrial" and "no question... these two men have had a very terrifying experience." These two professors, whom it is fair to call friendly to the UFO, were after all not lawyers or even psychologists; their expertise lay in astronomy or in engineering. A new argument for credibility seemed to have emerged when one of the troubled men underwent a polygraph test, which at best is hardly fully probative. This particular test wilts under Klass's scrutiny. It was administered, he shows, not by the customary independent team of licensed and experienced polygraph operators but by "a young, inexperienced, 'uncertified' operator" on the staff of the brother of the agent's friend and former classmate.

It will all happen again: unsupported assertions of marvels seen, interviews by credential-bearing investigators who will accept the tale, a media delight and a subsequent set of talk shows. It ought to be self-evident that such "contact" stories can gain weight mainly from assay by those experienced in the study of testimony, not from astronomers and aerospace experts. It was Klass the investigative reporter, not Klass the engineer, who gave us relevant matter about Pascagoula, exactly in the way he might have done for a Watergate. One should not forget that truth in the next journalists' marvel we learn about.

During the 1973 scare the four-man crew of an Army helicopter in Ohio reported a night near-encounter with a very bright object—at first reddish, then green, then white—moving at high speed, which threatened a direct midair collision, "sucked" their craft upward and temporarily killed their radio. The pilot told his story on the inevitable talk show and the crew collected \$5,000 as a prize for the "best UFO case of 1973" (which was not awarded to those Pascagoula passengers, even though two of the judges were the same men who had been so beguiled by their anecdote). The convincing Klass account is: A distant fireball (perhaps one of the Orionids, which would be right in date and direction), seen green through the green-tinted upper canopy of the aircraft, white when seen through the clear plastic below, dimmed to red at a distance. The pilot

had instinctively pulled the craft out of his first startled evasive descent maneuver up to a safe altitude. After the light had vanished the crew, in a state of near-shock, found themselves climbing at an altitude of 2,500 feet. The pilot described his actions to Klass from memory; what he recalled doing would indeed have pulled his helicopter upward. The airports he sought to contact as last resorts were beyond his normal radio range, as later tests showed; the one nearby tower had by chance not responded to his hurried call—a common enough occurrence. On later inspection nothing was awry with the helicopter. It was not a fraud but a believable misunderstanding.

There is no more explicit and insightful account of UFO's than this one. Still, as the author reflects in the last lines of his text: "The myth of extraterrestrial visitors will persist... because so many people want to believe." The reader can profit a great deal, even though the tone is sometimes rather more indignant than seems wise. We owe to the spirit of scientific curiosity a skeptical willingness to listen with patience to every witness, but to set highest of all the close examination of every bit of evidence.

YEARS FROM THE GREEKS: THE ANTIKYTHERA MECHANISM—A CALENDAR COMPUTER FROM CA. 80 B.C., by Derek de Solla Price. Science History Publications (\$8.50). In this thin, learned, well-illustrated monograph (first published in the 1974 *Transactions of the American Philosophical Society*) Professor Price recounts a strange tale with a surprising ending. Driven off course on their way home in 1900, two sponge fishing boats near Rhodes were blown off course on a rocky island. The storm ended, the wreckage was found over the side just off the coast. At the bottom, 40 meters down, a shipwreck, a ship many centuries old, their own, laden with treasure of statues of marble, sea-changed but still recognizable. In 1902 the ship, probably built by Rhodes to Rome about 2,000 years ago, had yielded its wealth of imagination since on proud display in the National Archaeological Museum in Athens.

A heavy formless lump of verdigris lay among the bronze fragments of a statue of Hermes as the Athens restorers tried to fit them together. There were

many such pieces, and each was examined again and again to see where it would fit. After months—during which the lump must have dried and cracked open because of remnant wood inside it, this one piece was recognized as some kind of mechanism. In 1958 Professor Price, a student of the ancient history of clockwork and fine instruments, reexamined the relic, which by then was widely known but only meagerly described. The cover of *Scientific American* for June, 1959, bore a photograph of the object, an illustration for his article "An Ancient Greek Computer." That study was tantalizing but largely conjectural; too many parts were lost or still hidden in the corroded mass. Since 1971 Professor Price has revisited the enigmatic and wonderful machine. This time he can almost see through it all, not only with improved insight but also with a fine set of careful radiographs, thanks to his collaborator, Charles Karakalos of the Greek Atomic Energy Commission. The evidence is here, in analyses, old photographs and new, and many radiographs, some carefully marked to outline the gear teeth. (The all-important tooth count was much aided by the meticulous work of Emily Karakalos.) Overall the mechanism has been pretty reliably worked out. There is a capping schematic diagram giving the full logical reconstruction of this ancient analogue computer as far as we have it. It resembled a tall, narrow, rectangular mantle clock in size and form (a Roman foot high, roughly equal to an English foot) with a drive axle on the right side. One turn of the crank drive—which may have been by hand or by water power—repeats a year. It was either set ahead or by day or perhaps moved as a demonstration device.

Its parts include a four-year dial for moon position and the stars, for the lunar synodic (moon moon and sun dials established.) The preserved in the front face of the calendar, and on the dials and include 40-degree and filed out of bronze about three in area. The metal is simple, with a tiny lead content probably coming from an occasional solder joint, doubtless a repair. This suggests to the experts, Earle R. Caley of Ohio State University and Cyril Stanley Smith

Reurairtel to the Bureau dated 4/26/76.

Bufiles reveal no information concerning Philip J. Klass of Dallas, Texas. Bufiles do reveal the following information concerning one Philip J. Klass, who has been affiliated with "Aviation Week" magazine for over 20 years. As of June, 1975, his home address was 560 N Street, Southwest, Washington, D. C. 20024.

In 1953, Klass was the subject of an investigation in connection with the unauthorized disclosure of classified information in an "Aviation Week" magazine article written by Klass. Since the classified information contained in the article could not be declassified for purposes of prosecution, no action was taken in this matter.

In addition, Klass has come to our attention on several occasions [redacted]

(S)

b1

Further, Klass telephonically contacted the Bureau on 2/18/75 and identified himself as Senior Avionics Editor, Aviation Week and Space Technology. In strong terms laced with sarcasm, he derided the publication of an article by Dr. J. Allen Hynek, "The UFO Mystery," in the February, 1975, issue of the Law Enforcement Bulletin. Klass suggested that by publishing this article, the FBI had given its endorsement

to a hoax (that UFOs are extra-terrestrial in origin) and to a fraud (Dr. J. Allen Hynek). Klass went on to state that he had investigated UFO sightings "with the thoroughness of the FBI" over a period of many years and found not one shred of evidence that any such objects as UFOs existed, let alone that they were from beyond the earth's atmosphere. He also contended that his investigations have led to several books and many articles on the topic.

In view of Klass' intemperate criticism and often irrational statements he made to support them, it was recommended that the Bureau be most circumspect in any future contacts with him.

ReLAairtel to Bureau dated 4/22/76.

Portions of the questioned document submitted by your office with referenced airtel have been previously received by the Bureau from other field offices. At that time, a representative of the Office of Defense Research and Engineering Strategic and Support Systems, Testing and Evaluation, Department of Defense (DOD), was requested to examine the material and comment regarding its authenticity.

After an examination, the DOD advised as follows: "This information was probably conjured up as a hoax. In any event, from a technical standpoint, the terms are not consistent with those used in a normal test report nor are they presented in language that would have been used in a flight testing business."

Recipient offices should conduct no further investigation into this matter and cases should be closed.

[Redacted]

Orange, California 92667
MISCELLANEOUS-INFORMATION CONCERNING

Enclosed for the Bureau and Phoenix are one copy each of a document and envelope addressed to Herzog Commodities, 170 Broadway, New York, NY, 10038, with the return address of a [Redacted] Sun City, Arizona, on 10/27/76.

b6

b7C

On 11/1/76, [Redacted] Herzog and Company [Redacted], 30 Montgomery St., Jersey City, NJ, advised that his firm's subsidiary company, Herzog Commodities, 170 Broadway, New York, NY, received through this day's regular morning mail, an envelope, which contained a return address of [Redacted] Sun City, Arizona 85351, and which was postmarked at Phoenix, Arizona, on 10/27/76. [Redacted] stated that the envelope contained a single sheet of xerox-type paper on which appeared eight reduced pages bearing the Secret classification. The reduced pages appeared to contain some kind of official but incomprehensible aircraft research data. [Redacted] advised that the document means nothing to his company, and he has no reason as to why it was sent to same. He stated that although the document appears to be the work of some eccentric, he nevertheless felt that it should be turned over to the FBI. [Redacted] further advised that the name of [Redacted] does not appear in his company's files as a customer or as a former or present employee.

identifiable with the [REDACTED]

b6

b7C

However, Newark indices do reveal that the same type of document appears in the case entitled "UNSUB, aka, Philip J. Klass, Box 6030, Dallas, Texas 75222, [REDACTED] [REDACTED] Orange, Calif 92667; MISCELLANEOUS-INFORMATION CONCERNING", Bufile 62-116443, NK file 62-3964.

The name of the above-described PHILIP J. KLASS and [REDACTED] appeared as the sender of several similar type documents as that attributed to [REDACTED] above, to the Bell Laboratories, Murray Hill, NJ, in April, 1976, from Dallas, Texas, and Orange, Calif., respectively.

Bureau letter dated 5/6/76, and Bureau airtel dated 5/11/76, in substance, described KLASS as a Senior Avionics Editor with "Aviation Week and Space Technology" magazine, with an office in the Press Building on Fourteenth St., N.W., Washington, D.C. The Bureau noted that in view of KLASS' intemperate criticism and often irrational statements he made to support them, it was recommended that the Bureau be most circumspect in any future contacts with him.

Bureau letter to Los Angeles dated 5/5/76, regarding subject, advised that the Office of Defense Research and Engineering, Strategic and Support Systems, Testing and Evaluation, Department of Defense (DOD), upon examination of the documents attributed to subject, advised that "this information was probably conjured up as a hoax. In any event, from a technical standpoint, the terms are not consistent with those used in a normal test report, nor are they presented in language that would have been used in a flight testing business." The Bureau instructed that no further investigation should be conducted and that said case should be closed.

Inasmuch as the document received from Herzog and Company is similar to those attributed to the captioned subject, it appears that the name of [REDACTED] is possibly another alias of the subject. In view of this, Newark will make appropriate reference to same and will not conduct any further investigation in this matter.

OUTSIDE SOURCE

Dear Mr. Baker:

I am writing in connection with an article I hope to author and publish to obtain the official views of the FBI on the use of "psychics" to assist in FBI investigations.

A number of articles have appeared claiming that "psychics" have provided valuable assistance to law enforcement agencies in locating criminals and the bodies of victims.

In an effort to try to learn whether such claims are valid, I seek authoritative answers to the following questions:

1. Has the FBI conducted any scientific tests to try to assess the potential value of using "psychics" in its work?
2. If so, what conclusions were drawn from such tests and is a report on the tests available?
3. If not, does the FBI have any present plans to conduct such tests?
4. Has the FBI ever made use of "psychics" in any of its investigative work? If so, with what results?
5. Has the FBI ever issued any policy statement on the use of "psychics", to provide guidance for its own agents and for other law enforcement agencies? If so, may I obtain a copy.

62-116443-8

12 JUN 25 1987

Your response to these questions will be greatly appreciated.

Philip J. Klass

Mr. Philip J. Klass
404 N Street, S.W.
Washington, D. C. 20024

Dear Mr. Klass:

Your recent letter requesting the FBI's views on the use of psychics in conducting investigations has been received.

Our Behavioral Science Unit has not studied the use of psychics by investigators, and we anticipate no such study in the foreseeable future.

Currently, the FBI has no rules or regulations covering the use of clairvoyants in conducting investigations. Although the Bureau has never contracted psychics as consultants, it is possible that individual Special Agents may have encountered people who have volunteered information based on their psychic impressions. Of course, information obtained from psychics would be handled in the same manner as leads obtained from other sources.

The FBI does not endorse or recommend the use of psychics in law enforcement, partially because the information obtained is frequently inconclusive. However, we do acknowledge that many police departments and citizens have relied on this type of assistance.

I hope this information will be of some help to you in writing your article.

Sincerely,

151

NOTE: Bufiles 62-116443, [redacted] and [redacted] contain information regarding a Philip J. Klass who was the Senior Avionics Editor of "Aviation Week and Space Technology" magazine and had an office in Washington, D. C. The dates of applicable file references range from 1958 through 1976. All files refer to unauthorized disclosure of classified material by the author. Bufile 62-116443, Serial 7, states that "in view of Klass' intemperate criticism and often irrational statements...it was recommended that the Bureau be most circumspect in any future contacts with him." Response was coordinated with SA [redacted] [redacted] of the Behavioral Science Unit, Division 2.

Mr. William M. Baker, Asst. Dir.
Federal Bureau of Investigation
Office of Congressional and Public Affairs
Washington D.C.

Dear Mr. Baker:

Earlier this year, I wrote to you seeking a statement of FBI position on the use of "psychics" for criminal investigation and you replied on April 22. (Copy enclosed.)

In your letter you stated that your "Behavioral Science Unit has not studied the use of psychics by investigators, and we anticipate no such study in the foreseeable future." Your letter added that "The FBI does not endorse or recommend the use of psychics in law enforcement..."

Since our earlier correspondence, I have learned that on several occasions a [redacted] named [redacted] was invited to give lectures at the FBI Academy, to large groups of police officers.

The source of my information is a deposition given on Sept. 5, 1986, by FBI Academy special agent [redacted] of the Academy's Behavioral Science Unit for litigation involving [redacted] in the Circuit Court of Jackson County, Oregon, resulting in part from her claims of an "FBI connection." (Case No. 85-3781-J-1)

b6
b7C

62-116443-10

It is not surprising that [redacted] should try to exploit this "FBI connection" in promotional literature intended to solicit commercial clients for her services.

What I do find surprising is that the FBI would give the 1988 appearance of endorsement of "psychic criminal investigators" by inviting such a claimant to speak before large groups of local law enforcement officials. Especially when your letter of April 22 indicates that the FBI does give sufficient credence to such claimed abilities to conduct a scientific investigation of their validity.

For this reason, I invite your comments.

Sincerely,

Rm 7350
TL-213

Dear Mr. Klass:

Your recent letter to Mr. William M. Baker, who has transferred to another Federal agency, has been referred to me for reply.

As you were previously advised, the FBI does not endorse or recommend the use of psychics by law enforcement agencies. In addition, we have not contracted psychics as consultants in connection with any of our investigations.

However, the FBI National Academy, as an educational facility, has an obligation to offer a full range of courses which are responsive to the needs and interests of its students. Because attendees of several FBI National Academy classes expressed interest in the topic of psychic phenomena in law enforcement, we obtained an appropriate lecturer on that subject.

The FBI does not believe that objective presentation of controversial subjects in an academic environment should be construed as endorsement of them. However, I thank you for your interest in obtaining the FBI's views in this matter.

Sincerely yours,

Milt Ahlerich
Assistant Director
Office of Congressional
and Public Affairs

NOTE: SA [redacted] of the BEHAVIORAL SCIENCE UNIT, TRAINING DIVISION, advised the RESEARCH UNIT, OCPA, of the circumstances surrounding his 9/5/86 deposition regarding [redacted] A [redacted], who is not identifiable in Bufiles, was suing [redacted] claiming fraud in connection with her alleged association with the FBI. SA [redacted] confirmed that [redacted] had accurately represented her dealings with the Bureau. No record of [redacted] is contained in Buindices. PHILIP J. KLASS is subject of Bufile 62-116443, which shows that he contacted the FBI in 1975. KLASS was displeased with the publication of an article, "The UFO Mystery," in the LEB. During a telephone conversation, he stated that the article was written by a fraud and suggested that in publishing the article, the FBI had endorsed a hoax. Also, the FBI had investigated KLASS, a writer with "Aviation Week and Space Technology" magazine, two times regarding his unauthorized publication of classified information. In addition, Bufile 62-116443, Serial 7, states that "in view of KLASS' intemperate criticism and often irrational statements...it was recommended that the Bureau be most circumspect in any future contacts with him."

Ref.: Your letter of Jan. 14, 1988

Dear Mr. Ahlerich:

Thank you for your recent response to my letter of Dec. 30 in reference the FBI's official position on the use of "psychics" in law enforcement and the lectures by such a claimant given at the FBI National Academy.

Your statement that the FBI should have the freedom to offer "objective presentation of controversial subjects in an academic environment" is quite valid.

What is open to challenge is the question of whether Ms. Noreen Renier, who commercially exploits her claims of psychic-powers, is "an appropriate lecturer" to make an "objective presentation on the subject."

As you know, the effectiveness of polygraph examination in determining whether a subject is being truthful, is a contentious issue. Does the FBI National Academy curriculum include a discussion of this issue?

If so, does the FBI Academy allow a single speaker, who represents one of the commercial polygraph training centers or a manufacturer of polygraph equipment, to make the only presentation on the subject of polygraph effectiveness? (Use of this example is not intended to convey my own views on polygraph.)

If, as I suspect, the Academy offers a much more balanced presentation on the polygraph, might it not be well advised to use a similar protocol in the future on "psychic detectives?"

Sincerely,

12 MAR 16 1988

Dear Mr. Klass:

Your January 20, 1988, letter regarding lecturers for the FBI National Academy has been received.

I am forwarding a copy of your letter to the FBI's Training Division for its consideration of your views. Thank you for your interest in the FBI National Academy Program.

Sincerely yours,

Milt Ahlerich
Assistant Director
Office of Congressional
and Public Affairs

NOTE: Correspondent is subject of Bufile 62-116443, and his previous communications generally have been accusatory or argumentative in nature. In his 12/30/87 letter, KLASS expressed concern that the FBI would give the appearance of endorsing the use of psychics in law enforcement by obtaining a lecturer on that topic for the FBI National Academy.
