2003 Meeting Schedule

The meeting reservation system has changed, and will be discussed at an upcoming meeting. All meetings are scheduled for the third Saturday of the month, but will be **confirmed quarterly**, and are subject to change prior to confirmation. Do **NOT** assume meeting dates - confirm them with a club officer!

- ☞ January 18th
- ☞ February 15th
- ☞ March 15th

Inclement weather phone number: (301) 474-5255

To the Workshops—Winter is Here!!

The November meeting featured an extremely large crowd of **about 80 members!!** You'd think it was the Christmas food meeting or somethin'!! Several prospective members came down from the **Philly area**, and a few more from **New Jersey** as well! **Welcome!** The club just keeps on growing!

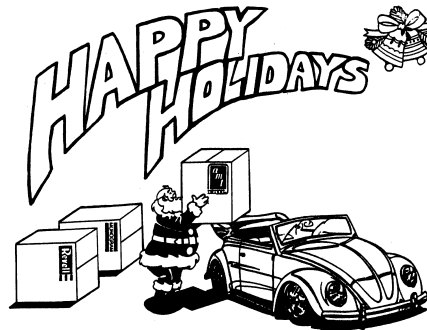

The large turnout was well timed, as the **Prince George's Gazette photog** surely got some great photos to go with the **story on the club** scheduled to appear in the near future!

Your **investigative re-**

porter has been very busy lately! Check out the **SEMA show pics**, **'Model' hoax** foisted on the world by **Larry Boothe**, and the discov-

Veber), and **Decal Application and Polishing** (from **Brad**) at the January meeting. **Be there!**

The raffle brought in **\$94.50 (plus \$52.00 from the box)**. I would like to thank the following people this month: **Irvin Arter, Ron Bradley, Brad, Bob Foster, Mike Hemp, Ron Hamilton, Barry Horner, Phil Jones, Tom 'Kar Krazy' McFiren Jr., JC Reckner, Bill Riblett, Walt Rook, Mike Zimmerli, Replicas & Miniatures Company of Maryland, and Overlea Hobbies. Thanks! And, Happy Holidays!!** 🎁

ery of **Lyle Willits' true identity** (wonder if his wife **Lee** knew?!).

If all goes well, we can expect seminars on **Tire Detailing** (from **Norman**

Eleanor!!

Not surprisingly, **Carroll Shelby** has inked a deal that will bring a **limited stock** (read: **expensive!!**) of **rebuilt, hot-rodded vintage Mustangs** to the market in January. He will debut an **"Eleanor" GT500E Shelby Mustang** at the **Barrett-Jackson auction**.

Eleanor was featured in both versions of **Gone with the Wind**. In the remake, Eleanor looked like a **modified 1967 GT500 Shelby Mustang**.

Shel's new Eleanor is a restored Mustang powered by a **Shelby-tuned**

V8 making 325 hp, and comes with options including a **nitrous oxide**

system, rollbar, 17-inch wheels, side exhaust and Baer brakes—starting at \$80,000. An all-out performance version goes for **\$120,000!**

A Yuletide Goat's Tale!

Twass the Night Before Christmas, 1964,
 When an elf came knocking on Santa's door.
 "Mr. Claus, there's a problem," was what the elf said,
 "The reindeer are sick, so they can't pull your sled!"
 "They caught the flu. They're hacking and wheezing.
 They have stuffy heads, and they're coughing and
 sneezing."
 Give 'em Nyquil," said Santa, "is what we should do,"
 "But it won't be invented 'til 1982."

"The reindeer can rest," Santa said to the elf.
 "This year, I'll deliver the presents myself."
 "I've got a new beast that can pull the big sleigh,
 A beast I've been saving for just such a day."

So, they went around back to Santa's garage
 And walked past a shiny, red Super Stock Dodge.
 "This one," said Santa, "belongs to Aunt Gina.
 She's a little old lady, down in Pasadena."

"The Dodge here is quick. My Corvette can run.
 But we need more than speed to get the job done.
 Delivering presents, we race through the skies.
 These cars are both fast, but I need one that flies!"

So, Santa walked down to the end of the row
 And unlocked the door of a new GTO.
 He hooked up the sleigh and said, "this one is mine.
 "Three deuces, a four-speed, and a 389."

He then cranked it over. It rumbled real loud.
 He idled outside, and then spoke to the crowd,
 "Without any reindeer, I'll still make my run.
 Just me and this Goat, we're gonna have fun."

He revved it up, and then popped the clutch.
 He wheeled through first, the guy was too much!
 By second, he's airborne, and pulling some G's.
 He powershifts third, while clearing the trees.

He circled the pole and then headed south,
 A twinkle in his eye, and a smile on his mouth.
 And we heard him exclaim at a hundred miles
 an hour,

"When all else fails, you should always Tri-
 Power!!"

*(Thanks to Tom S., and the Delaware Valley
 Old Goats club for this one!!)* 🐐

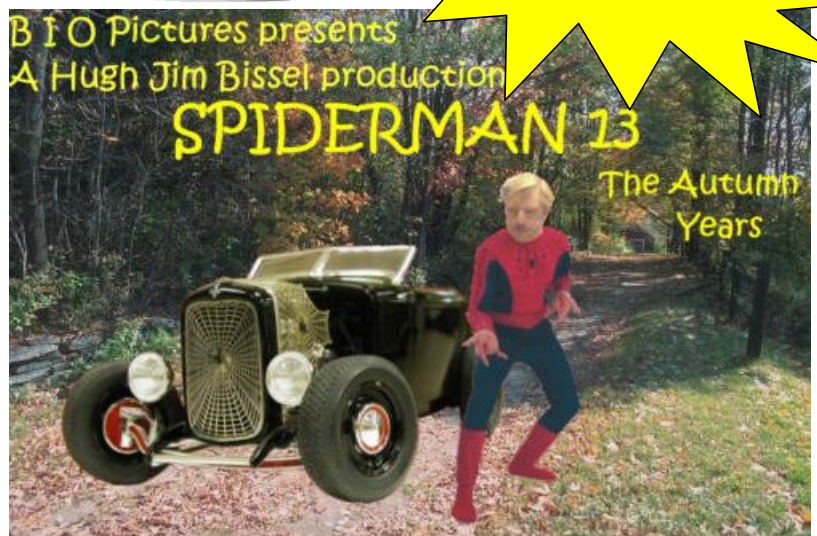

Twass the Night Before Christmas in Brooklyn

Twass da Night Before Christmas,
 Da whole house was mella,
 Not a creature was stirrin',
 Cuz I had a gun unda da pilla.
 When up on da roof
 I hoid somethin' pound,
 I sprung to da window
 To scream, "Yo! Keep it down!"
 When what to my
 Wanderin' eyes should appear,
 But da Don of all elfs,
 And eight friggin' reindeer!
 Wit' slicked-back black hair,
 And a silky red suit,
 Don Christopher wuz here,
 And he brought along da loot!
 Wit' a slap 'a der snouts,
 And a yank on der manes,
 He cursed and he shouted,
 And he called dem by name-
 "Yo Tony, Yo Frankie, Yo Vinnie, Yo Vito,

(Continued on page 10)

Flash!

MAMA's investigative reporter has uncovered Club Prez Lyle Willits secret identity, as seen here in full costume (*Hey Lyle, ya forgot yer mask!*). (Ed. Note: *It's all Peterson's fault, I bet!*)

Didja Hear the One About....?

A Yugo pulls up at a stoplight next to a Rolls-Royce. The driver of the Yugo rolls down his window and shouts to the driver of the Rolls, "Hey, buddy, that's a nice car. You got a phone in your Rolls? I've got one in my Yugo!"

The driver of Rolls looks over and says simply, "Yes I have a phone."

The driver of the Yugo says, "Cool! Hey, you got a fridge in there, too? I've got a fridge in the back seat of my Yugo!"

The driver of the Rolls, looking annoyed, says, "Yes, I have a refrigerator."

The driver of the Yugo says, "That's great, man! Hey, you got a TV in there, too? You know, I got a TV in the back seat of my Yugo!"

The driver of the Rolls, very annoyed by now, says, "Of course I have a television. A Rolls-Royce is the finest luxury car in the world!"

The driver of the Yugo says, "Very cool car! Hey,

you got a bed in there, too? I got a bed in the back of my Yugo!"

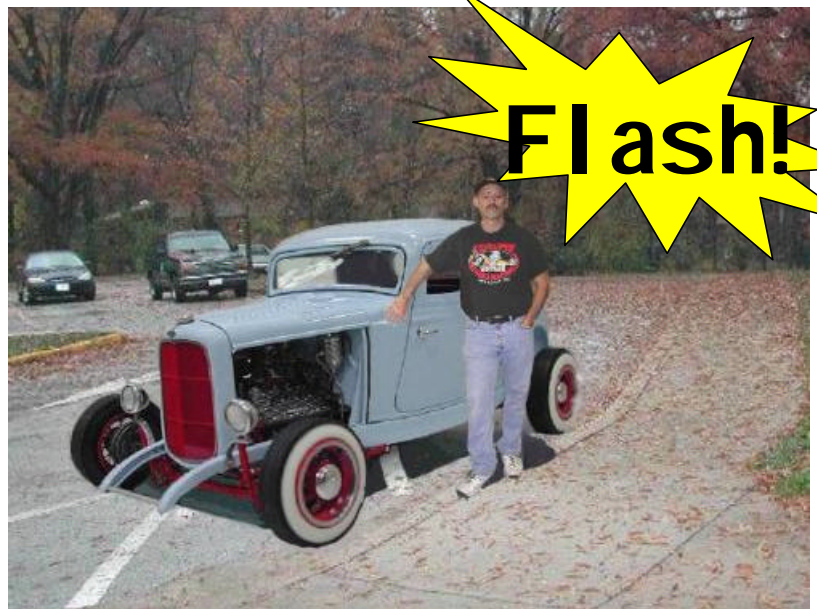

Upset that he did not have a bed, the driver of the Rolls-Royce sped away, and went straight to the dealer, where he promptly ordered that a bed be installed in the back of the Rolls. The next morning, the driver of the Rolls picked up the car, and the bed looked superb - with satin sheets and brass trim. It was clearly a bed fit for a Rolls Royce. So the driver of the Rolls begins searching for the Yugo, and he drove all day. Finally, late at night, he finds the Yugo parked, with all the windows fogged up from the inside. The driver of the Rolls got out and knocked on the door of the Yugo. When there wasn't any answer, he continued knocking, and eventually the owner stuck his head out, soaking wet.

"I now have a bed in the back of my Rolls-Royce," the driver of the Rolls stated proudly.

The Yugo owner looked at him and said, "You got me out of the shower to tell me *THAT?!?!?*" 🤦

Box art for the Hogan's Heroes Jeep, and the 1969 Coronet (See This 'n That column)!

Here is proof positive that the exquisite '32 Ford 'model' built by long-time MAMA member Larry Boothe is, in fact, a real 1:1 street rod!! This picture was taken at the November MAMA club meeting! That explains how he was able to include such fine 'in-scale' details – it was merely retouched photos of the real car shrunken to the proper size. You had us all fooled! Nice try, Larry!!

Off Road Madness

In summer 2003, the U.S. will get a steady trickle of hot little **Subaru WRX STi cars** (as many as 4,000) from Japan starting at around \$35,000 (!) apiece.

Boost from the straight-inlet IHI turbocharger (vs. 90-degree Mitsubishi unit on WRX) is increased on the STi (*Subaru Tecnica International*) by mounting a larger inter-cooler to force greater amounts of dense, cooler air into the turbo, while the dual Suretrac limited-slip differentials are pulling all four wheels as hard as they can. Output from the flat four in this version is **261 hp** (with 253 lb-ft of torque) in all non-Japanese-spec cars. (In Japan, horsepower is between 270 and 280 thanks in part to 100-plus-octane fuel). **Talk about being 'pumped up!'**

Major interior differences include a special leather MOMO

Fly "Air Subaru!"

steering wheel and suede-effect Prodrive-designed racing seats in front. The gold 17-inch alloy wheels are inspired by their racing counterpart, and the Brembo calipers look nice through the spokes.

Bruce Meyers, designer and builder of the original *Meyers Manx*, announced that he will enter a race version of the new *Manxter 2+2* in

this year's Tecate SCORE Baja 1000.

Meyers and Vic Wilson were organizers of the original Baja race 35 years ago, which they won in Meyers' first Manx.

The new Manxter 2+2 is an evolution of the original, built on a stock Volks-

wagen chassis and featuring a highly tuned version of the VW flat four engine. Meyers, now 76 years old, says he and Wilson will have "many, many co-drivers" this time. This year's Baja 1000 is scheduled for November 20th to 23rd, and will run the length of the peninsula, from Ensenada to La Paz.

For more info, check out http://www.meyersmanx.com/garage/garage_credito.htm, and <http://www.off-road.com/dunes/manxter//>.

Speaking of VW, the company is preparing to run its *Touareg SUV* in the **2004 Paris-Dakar rally**. They will also enter the

2003 race, scheduled to run January 1st to 19th to gain the team experience needed as early as possible in the buggy class. They are putting a tube-frame buggy class car together, that will be powered by a 1.9-liter turbo diesel. 🏆

The old and the new!

(Continued from page 1)

Shelby also plans to introduce a **first factory all-aluminum super-charged 427 Cobra**, like the two iron versions he built in 1965. They will be followed by other models next year. He will also celebrate 2003 with a **"40th Anniversary Cobra Tour,"** marking the **first Shelby Cobra racing championship**, with 30+ stops planned nationwide. 🏆

V-8 Bonnie!

For 2004, the *Pontiac Bonneville* will receive **V-8 power**, in the new, de-cladded, limited edition **GXP** model. The new **4.4-liter V-8** will produce **285 hp**. Sales are expected to begin in 2004.

Bonneville GXP

Apparently, the 'GXP' designation will be given to future performance models. The Grand Prix GXP is next, then the new Grand Am GXP, a Vibe GXP, and a Sunfire GXP (the latter two sporting super-charged 4-cylinder engines). I only have one question – where's the **Aztek GXP?! 🏆**

This 'N That!

Revell sold again! "RM Investments" has just purchased **Revell/Monogram** and **Revell AG**. The principal person in the purchase is **John Long**, the same person who tried unsuccessfully to buy the company a couple years ago. **Thanks to the Hobby Heaven message board....**

xXx is back! Some of you may have missed the auction on eBay of the **xXx GTO movie vehicle**. It was reportedly sold for **over \$30,000!** The really sad thing here is that the sellers finally admitted that the car was actually a **Lemans**, rather than a **GTO**. The good thing is that they swapped out the motor in favor of a **small block Chevy**, meaning that they didn't cut up an original GTO. They also beefed up the suspension for the movie stunts. It is reported that **seven cars were built**, five retaining traditional Poncho power, the other two small block Chevy motors.... **Lowrider Chevy!** **Jada Toys** is gonna release a **1/24th scale 1956 Chevy** in three different color combos – **Pistachio Green/Black, Metallic Red, and Gloss Black/Silver**. Check 'em out at <http://www.jadatoy.com/>.... **No more Marlboro?!** The British government recently passed

legislation that will effectively **ban tobacco advertising and sponsorship** of British sporting events and global sports staged in Britain (including **Formula One racing!**) **by 2006!!** The

government hopes the bill will be enacted by the end of the year, so you better stock up on all those **Marlboro-sponsored cars** while you can! Just after this was publicized, The

FIA, the Formula One sanctioning body, said the **Belgian Grand Prix will not be on the 2003 F1 schedule**, even if Belgian politicians agree to ease up on the country's stance on **tobacco advertising....Strange bedfellows!** **Ford Motor Co.** and **General Motors** jointly will **design and develop a six-speed automatic transmission**, for use in **large front-wheel-drive cars and sport-utilities**. Ford and GM engineers will work together to design and develop the tranny, but each

company will build its own version. Both automakers already had started designing it, but GM's design was chosen because it was further along... **Good & Bad kit news!!** It was reported on the **Hobby Heaven message board** re-

cently that **AMT first quarter 2003 Buyer's Choice kits** will include a **1969 Charger 500**, and a **1969 Dodge Coronet (!!!)**. **Don't**

ask! The bad news portion is that the **1960 Ford Sunliner convertible** announced in last month's newsletter has been **dropped...** **Happy Anniversary!** Ford will celebrate the **10th anniversary** of its first **Special Vehicle Team (SVT)** car with a **limited-edition SVT Mustang Cobra (coupe or convertible)** in red, black or silver, that goes on sale next summer. It will be powered by a 4.6-liter, 390-horsepower, 32-valve supercharged V-8. Only **2,003** will be built. Other touches include 17-inch dark argente-colored anniversary wheels, red leather seating surfaces, red brake calipers and SVT 10th Anniversary badges on floor mats and decklid.... **Getting Focused!** Apparently feeling left out by the impending release of the **Dodge (Neon) SRT-4 (a 215-hp turbo 2.4-liter pocket rocket)**, Ford has something called "**Project Panama**"—a **turbo-charged Ford Focus** under development.... **YET ANOTHER Mustang!** **Roush Performance** is introducing its **Roush Classic**, which shares the SVT Cobra mill. The Classic hits streets soon with a **\$43,000 base price tag**, and **limited to 50 units....** Check out the kewl new **2003 Hot Wheels: 1965 Bonneville, Steel Flame, Corvette Stingray, Fish'd & Chip'd, Switchback, Wild Thing, GT-03, 1/4 Mile Coupe, Zotic, Chapparal 2D, 8 Crate, Vairy 8, 24/Seven, Whip Creamer 2, Cadillac Cien, Ground FX, Swoop Coupe, Golden Arrow, Cadillac Escalade, 1970 Dodge Charger, Tire Fryer, HKS Altezza, Meyers**

(Continued on page 7)

Battle of the Brewskies! By: Tim Sickle

Well gang, with the release of the “Budweiser” Winston Cup car of Dale Earnhardt, Jr., the “Bud” dragster, and the “Coor’s Light” Intrepid of Sterling Marlin, it looks as though at least one of the model manufacturers is trying to give us what we want! And, we won’t run out and get drunk in celebration of the fact, either!

How do these kits compare with their ‘sister’ cars? Let’s see!

As you would expect, the similarities are great in both kits. As far as the “Bud” rail is concerned, in comparing it to the “Pennzoil” rail which is the last rail I had purchased, the differences seem to be

limited to the *new style intake scoop, the EVO-style front rims, the air intake*, and, quite obviously, the “*Budweiser*” decals.

The “*Coor’s Light*” Intrepid is based on the Bill Elliott Intrepid. The differences are limited to the presence of the ‘*barn doors*’ on the leading edge of the roof of Bill’s Dodge, which are not mentioned on Sterling’s car. Oh, and let’s not forget the ‘*Adult Collectible*’ boldly emblazoned on both box lids, lest we forget our government’s ‘*contribution!*’ It is also interesting to note that the “Coor’s Light” and “Bud” kits are *skill level 3*, while Bill’s Dodge

and the “Pennzoil” rail are only *skill level 2!*

It’s nice to be able to buy a beer-sponsored kit without having to pop for an aftermarket decal sheet to build it correctly! **Thanks, Revell!** 🍺

Eclipse.** Thanks to the **Hobby Heaven message board**...**Doh!** Due out in July, 2003 from **Polar Lights**, the Snap Kit of **The Homer** will come with a one-piece pre-painted **Homer Simpson figure**...**High-priced resin!** Got

wind of an **Ebay auction** of a **resin 1971 Buick Boattail Riviera** going for **\$351.00**, and with **one day left in the bidding, yet...** **Land speed racer Nolan White**, 71, died October 20th, from injuries suffered in a crash at Bonneville. White had set the SCTA/BNI record for **piston-powered, wheel-driven vehicles** two months earlier at Bonneville with a **413-mph average** over two runs. That record came despite a **blown tire** and **failed parachutes**. Using 45 years of experience, White steered the car safely off the course and onto softer ground, which stopped it. He returned to Bonneville

this month trying to get FIA certification for the record when the accident occurred. He had just completed the first of two required runs at **422 mph** but **all three of his parachutes again failed**. Using brakes and downshifting to decelerate, he again began to steer the car off the track, still going 300 mph. While turning, the car caught a wheel and rolled several times....The **2003 Dodge Viper** contains almost **20 pounds of carbon fiber**...**Hot Rod Aussie!** **Holden Special Vehicles** debuted the **HRT 427**, a **\$500,000** high-performance supercar concept based on the **Monaro coupe**. The car is named for its **Holden Racing Team** affiliation, and its **427-cubic-inch (7.0-liter) Chevy big block engine!** No specs, but the clutch is rated to handle **650 lb-ft of torque (!)**. **Yeah, buddy!** 🍺

Model Buffet

This column will continue to appear depending upon the flow of information and new products of interest to MAMA members.

Scale Equipment Ltd. is offering a 1973 *Hurst/Olds*, that features a body mastered by *Mike Hanson*, a beautiful decal sheet by *Slippery Arts*, photo-etched details,

and an interior tub with period correct details such as the proper steering wheel and foot pedals. The PE sheet includes the not to be overlooked dual gate shifter plate with the correct shifter shape. A promo style chassis is included, with modifications to allow for posable steering as well as adjustable ride height. Of course, vacuum formed "glass" is included, as are the correct tires with period correct markings, and chrome plated wheels and bumpers! The kit can be built curbside, or full detail. In fact, look for an article on how to do just that, written by *renowned author George Bojaciuk*, in an upcoming model car magazine. Kit #24111 sells for a mere \$74.95. Check it out at <http://www.seltd.net/>.

RnD Unique has announced the anticipated late October release of a resin transkit of the *Chevrolet Corvette-based Corvair Show Car* to follow the *Corvette "Waldorf" Nomad* recently added to their ever-expanding line of products. For info, contact R&D Unique

able for \$95.00. Check it out at <http://www.fishermodels.com/>. Thanks again to *Matt G.* Send items of interest to me at gtoguy@mindspring.com. ☺

MAMA's BoyZ do it in scale!

(Continued from page 3)

Aay Joey, Aay Paulie,
Aay Pepe, Aay Guido!"
As I drew out my gun
And hid by da bed,
He flew troo da winda,
And slapped me upside da head.
"What da Hell ya doin'
Pullin' a gun on da Don?
Now all's yours' getting' is coal,
Ya friggin' Moron!
Den pointin' a fat finga
Right unda my nose,
He twisted his pinky ring,
And up da chimney he rose.
He sprang to his sleigh,
Obscenities streamin,'
Away dey all flew,
Before he trew dem a beatin'.
Den I heard him yell out,
What I did least expect,
"Merry Friggin' Christmas to all,
And yous better show some re-
spect!" 🍷

2003 Pace Car!

One of these five possibilities
will be the **2003 Grand Prix Pace
Car**. [http://www.emipromo.com/
eaphase2/index.php?
source=nem&pagename=ma](http://www.emipromo.com/eaphase2/index.php?source=nem&pagename=ma).

The deadline for voting was
November 26th. Don't
know about you, but *is it
time to go racin' yet?!* 🍷

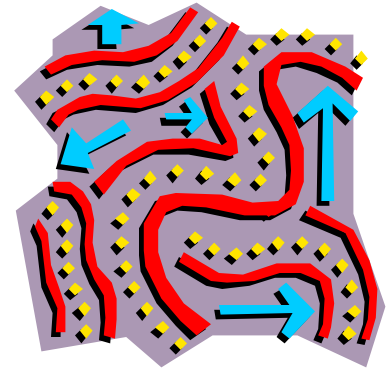

We're on the web!

<http://www.geocities.com/MAMAZboyz/>

Directions

**From the Baltimore Beltway
(RT 695):** Take Exit 7, Route 295
(Baltimore-Washington Parkway)
south towards Washington approx.
18 miles to Route 193 (Greenbelt
Road), and exit. When on the off-
ramp, stay to the right and merge
right onto Southway (see below).

**From the Washington Beltway
(RT 495):** Take Exit 22 north, to-
wards Baltimore. Stay in the right
lane and take the first exit onto
Route 193 (Greenbelt Road).
When on the off-ramp, bear to the
right and take Greenbelt road west,
towards College Park. Stay in the
right lane and immediately after
passing over the Parkway, make a
right (at the light) onto Southway
(read on!)

Once on Southway: Go straight
to the second (2nd) STOP sign.
Make a left onto Crescent road. Go
to the STOP sign and make a right
into the parking lot behind the
Greenbelt Library. Once in parking
lot, look to the right. The large,
white building is the Greenbelt
Community Center. Enter building
using the doors near fenced tot lot.
The multi-purpose room is on the
second floor. There is an elevator
to the left of the entrance. 🍷
