Job Announcement 2004-09

Position 080268

May 01 – Jul 02

Communications Plans and Programs Officer

United States Air Force, McGuire AFB, NJ

DESCRIPTION OF DUTIES - Assisted the Chief, Air Mobility Warfare Center (AMWC) Communications Support Division, in directing the operation of the AMWC's Networks, Applications Training, Information Management, and Ronald R. Fogleman Library. Identified and validated communications requirements, determined the most advantageous means to fill the requirements, supervised implementation of technical solutions, and documented the results. Ensured successful AMWC migration to Windows 2000 Active Directory architecture.

SPECIFIC IMPACT

- Served as project manager for \$200K McGuire AFB/AMWC video-teleconferencing equipment upgrade
- Directed all aspects of \$100K AMWC website upgrade; coordinated AMWC requirements with contractors and three geographically separated AMWC units to ensure successful integration of more efficient website with increased capabilities
- Coordinated Air Force mandated migration to Public Key Infrastructure to increase the security of the AMWC network
- Spearheaded redesign of streamlined communications tracking system; digital record keeping reduced time associated with processing of over 500 annual support requests

Jun 00 – May 01

Systems Technician

Verizon (NJ) Enterprise Business Group, North Bergen, NJ

DESCRIPTION OF DUTIES - Analyzed customer problems to determine the best technical solution, with specifications of LAN/WAN components and system integration techniques. Assessed bandwidth requirements to support numerous offsite facilities throughout the world. Implemented connectivity to function with cryptology equipment at each site while ensuring high availability of critical data. Duties also included knowledge of protocols and operation of the following equipment: Nortel OC-48 BLSR, TTC 310 and Tektronix test equipment, FORE Systems, Cisco- 2500, 4500, 7200 routers and 3690 switches, Bay Networks, SAMBA, Openstep 4.x, and APACHE Web Server, CYLINKS, Optical power meters, Oscilloscopes, Firebirds, various crypto (KG) units, multiplexers, modems, cable and connector types, and common data interface standards.
