# Important Information About IRIX™ 5.3 for Indy™ R5000™ and Desktop Special Edition 1.1

........................................................................................................................................

*(This information applies only to systems with IRIX 5.3 for Indy R5000 and pre-configured hardware bundles.)*

Your system has been pre-installed with IRIX 5.3 operating system software, which includes support for the R5000 processor. Several of the patches on the *Desktop Special Edition 1.1* CD are no longer current and are now incompatible with IRIX 5.3 for Indy R5000. Several new patches have also been pre-installed on your system. You can find additional information about patches in the Desktop Special Edition Release Notes 1.1.1 or What's New 1.1.1. Both are installed on your system disk.

Please note:

- All systems have the following patches pre-installed: 517, 841, 944, 1038, 1095, 1096, and 1144.

- Replacement: Patches 517, 841, and 944 can be re-installed if necessary from the *Desktop Special Edition 1.1* CD. Patches 1038, 1095, 1096, and 1144 can be re-installed via the web (see below).

- The *Desktop Special Edition 1.1* CD has the following patches that should **not** be installed with IRIX 5.3 for Indy R5000: 253, 455, 568, 617, 653, 670, 721, 766, 775, 824, 844, 926.

- The *Desktop Special Edition 1.1* CD has two additional optional patches, 615 and 1005, that are still current. They are intended for specific hardware configurations or locales.

- WebAuthor and WebAuthor/Serve systems have patches 517, 841, 944, 1038, 1095, 1096, 1135, and 1144 pre-installed. Patch 1135 can be re-installed from the Download Cool Software web page on Silicon Surf (see below).

- IndyStudio™ customers have patches 342, 517, 841, 944, 983, 998, 1038, 1095, 1096, 1135, and 1144 pre-installed. Patches 342, 615, 653, 983, and 998 can be re-installed if necessary from the *Composer Light* CD included with IndyStudio. Patch 1135 can be re-installed from the Download Cool Software web page on Silicon Surf (see below).

For a full description of patches installed on pre-configured systems, see the Desktop Special Edition Release Notes 1.1.1 on your system disk. There will be some additional newer patches recommended for certain system configurations or software applications. You can find out about these patches by visiting the Download Cool Software web page:

http://www.sgi.com/Products/Evaluation/evaluation.html

If your system becomes damaged and you need to replace it, or if you have removed the software on your hard drive, refer to the Download Cool Software web page. It contains the Desktop Special Edition Release Notes 1.1.1, What's New 1.1.1 , and patches. You can also call your local Silicon Graphics sales office.
