Installing Cosmo Compress™ Into an Indigo^2 IMPACT™ Ready Workstation

This flier describes installing Cosmo Compress with Extreme™, XL, or XZ graphics, or with Galileo Video™ and XL or XZ graphics, into an Indigo^2 IMPACT Ready workstation.

Follow the instructions in this flier to perform the installation of the boards. Do not use the tables found on pages 2 and 25 of the *Cosmo Compress for Indigo^2 Installation Guide*. These pages provide instructions for installing graphics and Cosmo Compress into an Indigo^2 workstation, not an Indigo^2 IMPACT Ready workstation.

Figure 1 identifies Slots A through D on the Indigo^2 IMPACT Ready midplane. Refer to this figure for help inserting the graphics and compression boards, or graphics, video and compression boards.

Figure 1   Identifying GIO Slots

Caution: Cosmo Compress can be damaged if placed under another board. Install the Cosmo Compress board in the slot above the graphics or video board (or both). The appropriate slot locations are provided in Tables 1 through 3.

Table 1   XL Graphics With Galileo Video and/or Cosmo Compress

Board combinations:	Use these slots:
Indigo^2 XL and Cosmo Compress for Indigo^2	Indigo^2 XL in B and Cosmo Compress in C
