Dear StreamCaster™ 2.0 Customer:

Congratulations on your purchase of StreamCaster 2.0, the MPEG2 playout server application. StreamCaster 2.0 runs on Silicon Graphics CHALLENGE® servers to provide a state-of-the-art system for the management, scheduling, and playout of multiple channels of MPEG2 over ATM for Near Video on Demand (NVOD), Enhanced Pay Per View (EPPV), and program origination.

To configure the CHALLENGE system and install StreamCaster software, refer to the *StreamCaster Installation and Configuration Guide*. For information on how to use StreamCaster, refer to the *StreamCaster Operations Guide*.

For the latest information on StreamCaster and other Silicon Graphics products, please visit our Web site at http://www.sgi.com.

Thank you for selecting Silicon Graphics software products.
