IMPORTANT - PLEASE READ BEFORE INSTALLING THE NETSCAPE ENTERPRISE SERVER!

PLEASE REFER TO THE 'README' FILE DISPLAYED AT THE BEGINNING OF SOFTWARE INSTALLATION FOR AN EXPLANATION OF HOW TO CORRECT THESE ERRORS.

Netscape Licensing Agreement

Your software license agreement allows you to install only LiveWire Pro and a combination of 5 of the Netscape servers included on this CD. Installation of more than 5 Netscape servers is a violation of your software license agreement.

Netscape Enterprise Server 2.01 - CGI POST error

Included in this version of the Netscape Enterprise Server 2.01 is an error in the default file

*/usr/ns-home/https-<***hostname***>/config/obj.conf* .

The error consists of unneeded restrictions imposed on the CGI interface. It does not allow you to access CGI scripts with the POST method, usually found in HTML forms. The error you will see in the logs/errors file is:

```
[10/Mar/1997:12:30:22] config: for host 199.19.19.1 trying to POST
/do-form.cgi, handle-processed reports: no way to service request
for /do-form.cgi
```
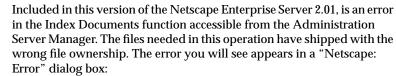

Continued on back

Netscape Enterprise Server 2.01 - mime.types does not recognize PC exe's

Included in this version of the Netscape Enterprise Server 2.01, is an error in the default file

*/usr/ns-home/https-<***hostname***>/config/mime.types* .

It does not let the server recognize binary files for the PC. This will cause the server to send the files as "text/plain" and not as "application/octet-stream".

Netscape Enterprise Server 2.01 - Document Indexing error

Included in this version of the Netscape Enterprise Server 2.01, is an error in the Index Documents function accessible from the Administration Server Manager. The files needed in this operation have shipped with the wrong file ownership. The error you will see appears in a "Netscape: Error" dialog box:

```
JavaScript Alert:
System Error: General failure
Error return is -2
```

The system returned error number 2, which is No such file or directory.
