

April 15, 2002

Dear Valued Customer,

As of February 2002 and the release of IRIX 6.5.15, the SGI Scientific Computing Software Library (SCSL) is being delivered with IRIX as part of the fourth overlay CD, although it is a full image. The latest version is SCSL Scientific Library 1.4.0.1. This version may also be downloaded from the following website:

<http://www.sgi.com/products/evaluation>

All future versions of SCSL will also be delivered with IRIX and available for download from the above website. Therefore, SGI has removed SCSL from the Developer's Plus program "Welcome" bundle you are receiving.

This change in delivering SCSL enables most customers to have immediate access to SCSL rather than to have to order a separate CD, as was necessary in the past.

We thank you for your business and we hope that you will find this change to be satisfactory.

Regards,

SCSL Product Team
