Indigo^2 Video Cabling Instructions

If you purchased the Indigo^2 Video option, you received an Indigo^2 Video cable as shown in the figure below. You did not receive a breakout box shown in some of the figures in the *Getting Started Guide*. The breakout box is included with the Galileo Video option only.

Install the Indigo^2 video board into the workstation chassis as described in the *Getting Started Guide*. Attach the Indigo^2 video cable as shown in the figure below, then attach your video components directly to the connectors on the video cable.
