

Versatile, Powerful and Flexible

Compaq and BroadVision® have partnered to ensure that customers have full-featured, high-performing, flexible solutions for building e-commerce sites.

Designed for everything from e-banks to B2B exchanges to e-procurement systems, BroadVision applications power successful e-businesses around the world.

The flexibility and security of industry-standard Compaq ProLiant™ servers running Windows NT and Windows 2000 operating systems enable customers to deploy highly scalable, reliable e-business solutions at a lower cost than comparable UNIX-based solutions.

Our partnership brings you:

- > Proven solutions for simple and fast sizing, deployment and management
- > Scalability and high availability you need for successful e-business – at superior price/performance
- > Robust e-commerce applications for selling, buying and exchanging information over the Web and on wireless devices
- > One-stop shopping for complete hardware/software solutions and services

Compaq and BroadVision are working together to simplify configuration, sizing, deployment and management of e-commerce systems.

Compaq and BroadVision Solutions

Optimized solutions

The Compaq and BroadVision partnership includes joint engineering and tuning to ensure the best Compaq hardware configuration for running BroadVision applications. This cooperative engineering provides reliable, integrated and innovative joint solutions.

Robust performance at lower cost

Compaq *ProLiant* servers provide a high-performing, high-availability platform for deploying BroadVision e-commerce applications and offer a simple and economical approach to scale your business as needed.

Industry leader for Microsoft Windows

Compaq *ProLiant* servers lead the Microsoft Windows server market. In addition, *ProLiant* servers are the preferred Windows platform for BroadVision and Compaq Global Services is BroadVision's preferred Windows infrastructure services provider. That means you can count on trouble-free integration and knowledgeable service for your Windows-based Compaq and BroadVision solution.

Comprehensive resources

As a result of our joint engineering, you'll soon be able to access Compaq and BroadVision solutions on Compaq *ActiveAnswers*™ and via our partner consultants, systems integrators and value-added resellers.
