

Register today for our FREE seminar and hands-on training

Join us for a FREE seminar at a location near you to see how Microsoft Exchange/Outlook applications can use Replic-Action and Compaq Work Expeditor to seamlessly integrate over 35 data stores including Oracle, SAP R/3 and even Lotus Notes—in real time as well as in batch mode—without having to write a line of custom code.

You'll leave with fully functional 60-day versions of Casahl's Replic-Action and Compaq Work Expeditor software.

Replic-Action for Microsoft BackOffice

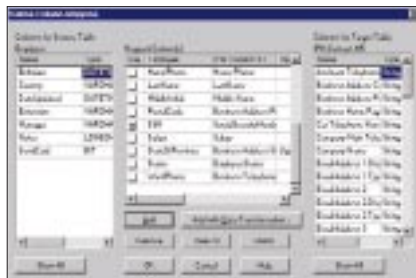

Whether your project requires moving data from Oracle to SQL Server, SAP data into an e-commerce webserver, Lotus Notes to Exchange, or accessing ERP information such as SAP R/3, Replic-Action can help.

Replic-Action allows you to:

- Link native Outlook (Contact, Post, Task etc.) information to nearly any backend system, including SQL Server, DB2, AS/400, Oracle, Informix and more.
- Populate SQL Server data marts from corporate data warehouse.
- Integrate ERPs and DBMSs into a webserver for internet and intranet applications.

Replic-Action enables workgroups based in SQL Server and Exchange to easily access and synchronize enterprise data.

The Replic-Action server-based engine offers bi-directional synchronization, sophisticated data transformation, and a hands-off scheduler—all without having to write a line of custom code and all based on a scalable server architecture.

For easy mapping, Replic-Action automatically retrieves column names from a SQL Table and the fields from an Outlook form.

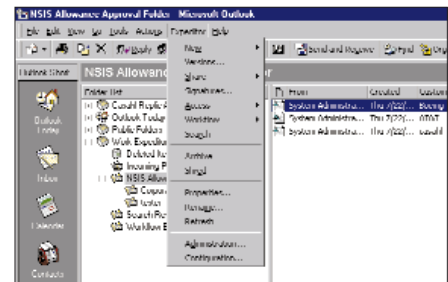

Compaq Work Expeditor

Enterprise enabled collaborative and knowledge management solutions empower your workgroups to collaborate more efficiently, take better control of business processes, and improve customer service.

Compaq Work Expeditor at-a-glance:

- Real-time, dynamic collaboration
- A customizable and extensive security framework
- Transparent integration with outlook
- Workflow template for repetitive processes
- Point-and-click menu selections for easily building collaborative solutions

Compaq Work Expeditor uniquely combines four components—document management, workflow, a security framework, and a solution building capability—into a tightly integrated product that extends the capabilities of your Microsoft Exchange environment to build collaborative and knowledge management solutions.

For ease of use, Compaq Work Expeditor is very tightly integrated with Microsoft Outlook user interface. As a result, any Compaq Work Expeditor solution deployment requires very little or no training at all.

Register today for a FREE enterprise enabled collaborative solution seminar

FREE Seminar Agenda:

- 8:30-9:30 Registration and Continental Breakfast
- 9:30-10:30 **Software Capabilities Demonstration:** Examples include integrating Compaq Work Expeditor/Exchange/Outlook with SQL Server, and more.
- 10:30-11:00 **Load Replic-Action and/or Compaq Work Expeditor** onto participants' laptops. (Laptops must be configured with appropriate pre-requisites provided at the time of registration.)
- 11:00-12:00 **Hands-on Exercises**—build an application from scratch.
- 12:00-12:30 Lunch
- 12:30-1:30 **Compaq Work Expeditor Demonstration**
- 1:30-2:30 **Optional one-on-one project consultations** by Casahl and Compaq Technical Consultants.
